IQ

Program

CORNING
Fiber IQ

Learn from our experts. ■

Corning Cable Systems has built strong relationships with industry-leading contractors, designers and end-user customers, in addition to developing a community of technical trainers and institutions through the Fiber IQ program. Each member institution has proven dedication to preparing students for tomorrow's fiber optic industry. You can turn to us with confidence, knowing that no one understands fiber optics better than the company that invented it. In addition to innovative technologies, we also bring a level of expertise and industry support that no one can match.

The Fiber IQ Program was designed to assist instructors and their students, as well as provide a direct line of communication between Corning Cable Systems and fiber optic instructors. We are seeking to build relationships with leading trainers to introduce fiber optics to the marketplace in an effective and efficient manner.

**Fiber
IQ
Program**

no one understands fiber optics better ■
